water resistant laminate.

Beautiful wooden floors for all lifestyles

Give your customers a broad choice of elegant, water-resistant laminate floors with the extensive Ocean+ range. This collection selects the best BerryAlloc wood designs, with detailed, realistic structures and trending colours, suitable to any lifestyle and for any room within your house, including kitchens and bathrooms. Ten bestseller designs were created in two plank sizes of varying thickness, and both in class quality 32/AC4 and 33/AC5, to respond to all possible wishes.

The pioneer in water resistance

These 100% water-resistant floors are fully protected thanks to our pioneering Hydro+ technology. Back in 2008, BerryAlloc was the first company to launch this innovation on the laminate market. This unique formulation has well-proven its durable quality and value for money, after years of exposure to daily life situations.

100% water-resistant laminate: how does it work?

In the Ocean+ collection, a hydrophobic coating is applied to all sides of the planks, repelling water when it comes into contact with the joints. Combined with the airtight locking system, water is unable to seep through. With a characteristic water-resistant surface, a high-quality, moisture-resistant HDF core, and a range of hydro+ finishing accessories to protect sides and transitions, the Ocean+ range is fully equipped to withstand exposure to water. Spills, wet raincoats, and muddy shoes... bring it on!
